Sorry for the delay. This is NOT a BID vendor.

Hi Don,

Very early this morning we started to receive calls about the company in the photo below using the water from the Parking Spot and broke the landscape line, leaving the water gushing out. Instead of sticking around to fix the problem or at least shutting off the water, they just left. We had a very bad flood at the Parking Spot last year.

Without knowing all the facts at this time wanted to see if this is the company the Bid uses and where they working last night?

Thank you.

Securely,

Eric Glyn-Davies

Eric there were some guys cleaning your building (specifically power washing) using our water supply...something broke and somehow they are unable to turn off the water supply (it requires a tool) and it is currently running leading into the valet driveway. I instructed the supervisor to try and call the Fire Department to turn off the water. It is not as rapid as the water from the a few months ago however if it is allowed to run could cause some issues.
